Hi Burt!

As of this morning, there does not seem to be any heat coming from the pipes in my room. I really appreciate you checking into and fixing the situation!!!

Helen and Jim,

I met with Steve from Physical Plant and we figured out what we could turn off in the steam room without shutting down any of the Vivarium functions, and so hopefully the radiation is cooling down. If nothing else, overall the building should be considerably cooler.

Let me know if on Monday morning you are still getting heat radiating from those pipes.

Have a great weekend,

Burt

thank you, we appreciate it,

It's not that we don't like heat - in January....:)

Helen,

We have had the same complaint in other parts of the building. For some reason the Physical Plant people are having problems with shutting down the radiation for the summer – so I'll forward this on.

Thanks,

Burt

Hello Burt!

Can you take a look at our situation in room 224? The heat is coming out of the pipes.....
